# DHTML API

Hits: 4,325

**Description:** Animate your website with the aid of DHTML. After being confounded by the javascript files that I came across on the internet, I decided to write an API that I could live with. Any content that you place within a <div> tag with the position css attribute set to absolute, can be manipulated like a sprite. Just don't forget to set id="unique\_name", and pass "unique\_name" to the GetLayer() function.

## Resource Specifications

<b>Version:</b>	1.0
<b>Price:</b>	Freeware
<b>Date Added:</b>	Apr 2nd, 2004
<b>Last Updated:</b>	Apr 17th, 2005
<b>Author:</b>	Francisco Charrua
