Newswriter 2005

Hits: 13,036

Description: The Newswriter is a simple script to publish and administrate your News. There is no need for a database. The News are stored in a simple file. I've coded this script because the others I found were too complicated and not adaptable enough.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, freebsd, osx, sun
Price:	free
