My Blog

Hits: 13,405

Description: This blog script will quickly and easily allow you to post articles and comments for your readers to keep up with. You can select an image to go along with your entry and even attach files. Admin gets emailed when visitors leave comments. Data can be stored via MySQL or data files. MySQL optional. Pictures automatically resized when uploaded. Post from your email or cell phone. Specify how many blogs to display on a page. Plug-ins for My Calendar and My Photo Gallery available, with more to follow! There's also a comprehensive language module that makes translating My Blog a piece of cake. Already supported are English, Italian, and Finnish. Your visitors can also subscribe to email notifications of new entries, or use the RSS feed automatically generated by the script.

Resource Specifications

Version:	1.7
Platform(s):	linux, windows, freebsd, osx, sun
