# Proxy Changer

Hits: 5,443

**Description:** A faster way to change your proxy settings in Internet Explorer. Disable or enable the proxy, or set it to a default proxy setting or use an alternate setting. Minimizes to the system tray where you are only a right-click away from changing the setting. Great to use if you need to change your proxy often. (You may need to restart IE when you change the proxy for the change to take effect) No need to install, it runs right from the exe file.

## Resource Specifications

<b>Version:</b>	1.1z
