## Advanced Login Area Designer-Integrator(ALADIN)

Hits: 56,211

**Description:** With this program you will be able to protect directories, create login area within minutes. Only registered users, members gain access to the protected area. Program combines visual directories password protection, member management, total user access management. It consists of two parts: web based admin control panel and user area (adaptive forms and modules); supports manual (administrative) and automated (online) regimes. Self-installing software - no programming skills, no authentication or php knowledge required – take, set it up and launch at once. One click on the folder - directory will be protected and protected area created. Your web site is ready to register and authenticate users. Program provides control panel with your directories tree image. Using only your web browser you will be able to perform all operations like password protection, multilevel access management – activation and diactivation, user account management, modifying of program settings.

### **ALADIN - easy to setup, great to use, Oct 12th, 2004**

Reviewed By: diggitychen

ALADIN is great! Especially for people (like myself) that aren't the most technical. The set up was very straightforward. It actually worked on the first try whereas with other password management systems, I would need to tweak a little here and there in order to finally to get the system working. Once ALADIN is running, it's very easy to password-protect a directory and add user accounts. The file-tree graphic interface is really handy and a good way of managing password protected directories.

I would have used a different color scheme, though. Sometimes the pink makes it hard to see the buttons and text. Also, the people at Diofant (Alex, especially) are great to work with. Very helpful and responsive to your needs and questions.

Visual, graphical, password protection and access management for our email letter subscriber club. This is a great protection program at a very reasonable price. Excellent customer service. Alex is a wonderful help if you get stuck and will stay with you until you are satisfied.

### **Easy to use and Great Customer Support., Nov 29th, 2004**

Reviewed By: DGreenyc

We're a national membership organization and needed a program to protect our member-only section that would recognize our ever-changing membership. Alex and the folks at Diofant customized the program exactly to our needs and the system works great. Alex was great - he installed the system for us and helped us out of a few jams that we created - all for a very reasonable price.

I setup my website 12months ago with the thought that I needed a login script from my photographic website. As I don't have any SQL scripting skills I found my way to Hotscripts and eventually to ALADIN. This product is perfect for my needs. Multiple layer levels, quality customer service with regular updates. Alex and the Diofant team have come up with a great product and I thank them from the great work they have done with my website. If you want a stylish and sophisticated login system that gives you the power choose ALADIN.

Thanks guys.....

**ALADIN makes it very easy to apply security protocols**, Feb 8th, 2005

Reviewed By: Michael Riley

?building websites, but your software makes it very easy to apply security protocols on files and directories. Your software is working very well. Always remember to BELIEVE in yourself regardless of what other people say. Great things come from those who refuse to follow the crowd.

**Best Product Support Anywhere**, May 23rd, 2005

Reviewed By: Croslin.Org

Diofant provides some of the best product support I've come across in 28 years! They offer a very powerful product and amazing support. Buy this product, it's priced right, does as advertized and comes with first rate support. Their customizations are exactly as defined. If you need security and all the registration security levels and authorizations, lost password and automatic or manual registration authorization... this is it!

### **Top notch support for a great product!**, Oct 8th, 2005

Reviewed By: eyewire

I installed Aladin effortlessly on a Linux server the first time. It exceeded my expectations in being so easy to set up.

The second install of the product came with difficulties because I was not set up as the network admin. But given this situation, Alex came through and was able to diagnose the problem and fix the entire setup in record time!

If you're not wanting to reinvent the wheel and need login functionality for your web site, I recommend this product highly!

### **Advanced Login Area Designer-Integrator - ALADIN!**, Feb 12th, 2006

I have spent a lot of time by surfing the net for the good security software, until I have found Advanced Login Area Designer-Integrator - ALADIN!. This software is really great. A lot of function, easy setup and the best 24/7/365 support. I recommend this software to everyone who need professional security software.

### **Aladin was the solution for my membership management needs**, Feb 13th, 2006

Reviewed By: webotech60

After searching for a while for a membership database management program I came across Aladin and knew it was the solution I was searching for. Not only was it affordable but Alex and his team provided me with excellent and courteous technical support throughout the simple installation process. Their guidance made the whole process from start to finish an enjoyable one including learning the easy to use interface that makes protecting and unprotecting my site's directories a snap.

### **Excellent program**, Mar 22nd, 2006

### **Non Existent Support for this product**, Dec 12th, 2007

Reviewed By: jmccann

This product reports to do many things, however practically nothing is documented. There is a sparse one page "testing" document.

The product is described as having "seamless" integration with Online Payment providers. Nothing is documented. We have made at least 4 requests for information on integration with the product. We have received absolutely nothing back from company, not even an acknowledgement.

My review can only be 500 characters which is unfortunate as I have so many great things to say about this software. I will start by saying I tested most of the protected scripts on the market and Diofant Aladin was the best by far. Installation completed by Diofant, EXCELLENT, Support for Aladin is EXCELLENT, the staff and response to questions is EXCELLENT. If you want a more detailed review please contact me +44(0)7931387303. Aladin now services over 600 members on our site without fault.
