# CFAWS

Hits: 769

**Description:** CFAWS allows ColdFusion developers to build their own Amazon Web Services store, integrate Amazon product feeds into their content sites, and extend the functionality of their stores to their users quickly and easily. With the full featured CFAWS custom tag, you can have an entire store up in a matter of a few hours (or less once you get to know the tag...)

Resource Specifications	
<b>Version:</b>	1.0
