Hi Everyone,

I surely hope that you read this review prior to purchasing this script. I purchased and once installed everything was going ok aside from a few of the features not working and outdated proxies. A short while after the engines changed some things etc.. the script stopped working. I have contacted them over and over again and still have not had a reply. This has been about 3-4 months now that I have been requesting help.

Please, if you don't want to throw your money out the window than do not buy this script.

Hope this helps all of you and I am happy to send this review.

Kind Regards,
Randy
