PHPSiteStats

Hits: 5,468

Description: PhpSiteStats is a web based website statistics , monitoring and tracking software for any webmaster that does not have acces to the server logs.

It can be used an any server as it can be either database driven or logfile driven so it does not have fixed requirements

It should acomodate both small and big web sites and is not complicated to implement or going to clutter the website

It allows the visitors of the site to see live status and the administrator to preform monitoring tasks for the site It features GD progress line and percentage pie graphs and statistics for the numerous types of data it logs.
