# SESSION RENEW - dropped sessions=dropped customers, keep your customers

Hits: 1,041

**Description:** Session Renew for ASP.NET

<br />

Dropped Sessions = Dropped Customers.

<br />

Session Renew keeps your customers.

<br />

Session Renew is unique because it requires no pop-up or page-refresh resulting in no interruption of work-flow.

<br />

Session Renew gracefully alerts the user of impending session end through a DHTML floating window, the user then can choose to renew the session and is provided immediate feedback with no work-flow interruption.
