Wysigot Light

Hits: 575

Description: Wysigot is the browser that monitors any site or any file anywhere (web, ftp, LAN, local).
With its powerful tools for capturing, updating, sorting, comparing, archiving, showing anything new (alarms, highlighting modified texts, ...), with its powerful settings and its three searching modes, Wysigot is the essential online/offline web browser and monitoring tool.
Wysigot also allows you to see how any web page works (scripts used and so on).
