GA'a - AWS - Module. Display Amazon content on your Site

Hits: 1,399

Description: GA's Amazon Web Services module is a tool to display content from Amazon.com on your web site based on search query. Properly configured and executed a search query will display items sold at Amazon mega store related to your page content or local database/site search query. Currently the module can be configured to access USA, UK, Germany, Japan, France, and Canada Amazon Stores. Output is highly configurable. Updated to comply with Amazon Web Services v4.0
