PhotoPost Classifieds

Hits: 9,690

Description: From the developer of the well known PhotoPost PHP Pro gallery software comes PhotoPost Classifieds. Connect buyers with sellers in your site's area of interest, or offer personals or job postings. With automated photo uploads and web based configuration, PhotoPost Classifieds is a no-hassle way to add a popular new dimension to your site. If you already have a forum (vBulletin, UBB Threads, phpBB2, or SMF Forum), PhotoPost Classifieds can use your existing user database for one centralized login, rather than making your users register twice, or use our built-in user registration system. Includes a feedback system styled after eBay's, a bidding system, PayPal payments, ad expiration, and optional zip code integration.

App is full of html errors, support is useless, Aug 2nd, 2007

Reviewed By: atddoug

Do NOT buy this classifieds app! Apparently, as long as it displays ok in the browser, they don't care about fixing simple html errors. They use XHTML doctype, then don't bother to comply. Duplicate end tags, end tags missing for tables, rows and cells, incorrect input and image tags, etc. The index page alone had 93 errors!!! I spent 10 hrs fixing 23 pages to make it validate in w3c.

And "Chuck", their support guy, is rude and indifferent. Check their forum and you'll see what I mean.
