WODA

Hits: 6,890

Description: WODA is a Perl program that manages web-oriented, semi-relational, multimedia databases. It allows them to be maintained, added-to, modified, and queried through the WWW. Some examples of its applications are membership lists, bibliographies, document archives, virtual journals and libraries, catalogues, hot-lists, classifieds, discussion systems, mailing list archives, rings of web pages, questionnaires and more.

Resource Specifications
