Deep Log Analyzer

Hits: 5,909

Description: Analyze web site visitors' behaviour and get complete web site usage statistics. Deep Log Analyzer features hierarchical reports presentation with interactive navigation, convenient graphical charts and open database format. View how statistics change over time, compare reports for different time intervals, dig deeper into your site data with the unique hierarchical reports and reveal hidden patterns in your site stats.

Get reports about accessed site resources, visitors' activity, referral sites, search engines and keywords, browsers and OS, search spiders, server errors and more. Create your own custom reports; access the website statistics database in other applications.

Analyze log files from all popular web servers including IIS and Apache, download log files via FTP, process logs archived in gz or zip on the fly without extracting them. Print or export reports into html.

Use Deep Log Analyzer to create and view advanced reports with marketing, SEO or technical information.

Resource Specifications
