CB Gallery

Hits: 11,317

Description: The CB Gallery Component is as simple, yet powerful, as any gallery can find. You simply upload the files included (the last upload you will ever need to to, even to add images), set some preferences, and you have complete web based control of your photo gallery! This web based administration tool lets you upload images, manage individual gallery preferences, and even create all of your thumbnails for you! You don't even need to open up Flash! Although, USER SKINNING is COMPLETELY supported!

The gallery supports user comments, owner comments, and many other features. Please view the demo at the link provided.

Resource Specifications	
Version:	1.5
Platform(s):	Unix, Win, Mac
