VistaDB 3.0

Hits: 1,751

Description: VistaDB 3.0 was developed in C# to be the world's first fully managed SQL database engine built specifically for the Microsoft .NET Framework, Compact Framework and Mono. VistaDB is smaller than SQL CE, and works in shared hosting environments. No CPU or RAM limitations imposed by our engine. Features include royalty-free distribution, easy-to-use small single-file 600KB footprint, ZeroClick deployment lets you embedded VistaDB directly into your EXE and DLLs, Visual Studio 2005 integration, built-in ADO.NET Provider, Direct Data Access™ objects, T-SQL compatible SQL query processor, data types are 1:1 compatible with SQL Server, Data Migration Wizard, Data Builder tool for managing databases (C# source code included), robust single-file data store, ANSI and Unicode support, tables, views, CLRProcs, indexes, constraints, primary and foreign keys, Blowfish encryption, transaction processing with Snapshot isolation.

Resource Specifications

Version:	3.0
Platform(s):	windows
Price:	\$329
Date Added:	May 21st, 2004
Last Updated:	Apr 3rd, 2007
Author:	VistaDB Software, Inc.
