Download Trakker

Hits: 6,003

Description: Download Trakker logs information about an infinite number of files. It logs the following information: Name, IP, Browser, E-mail, Referrer, number of downloads, and the time/date. You can force a user to download via form, or just a direct link. The user receives an email with an encrypted download link. With these emails you have the opportunity to send out emails to each person that has downloaded your file.

The file you specify will be 'forced' downloaded, meaning that if it is a .gif file, it will not simply open up in the browser, but the user's browser will show the file download dialog.

Resource Specifications

Version:	3.4.0
Platform(s):	linux
Price:	Freeware
Date Added:	May 27th, 2004
Last Updated:	Jul 24th, 2006
