Great portal system, Sep 28th, 2004

Reviewed By: andrey2k5

This is a really great portal system. I was sceptically at first because it uses Invision Super Board core but once I installed it I felt in love with it. It has forum, live chat, download section, new section, blog, review, etc and through mkportal and isb admin section you can configure every aspect of your site. It also uses Invision skins so finding the right theme took me exactly 5 minutes. i highly recommend this script.
