LinksManager.com - Editor-Based Link Exchange Application Service

Hits: 3,436

Description: LinksManager is a patented editor-based link management application service that supports reciprocal linking, link exchange, non-reciprocating links, one way links, exit links, resources, a directory, or a large portal.

LinksManager saves you time by sending your links pages to your server anytime they change. LinksManager will check for reciprocal links and dead links, and reports the results to you. LinksManager is perfect for managing organized links pages, a robust portal, or a resource directory. LinksManager adds value to your site and increases traffic to your site by linking with other relevant sites.

Other features include Linklets which allows virutally any output arrangement for link publishing and LinkBlogs which combines the power of linking and blogging.

LinksManager requires no downloads so there is no troubleshooting script installations. There is never a charge for software updates. Free Trial: Try LinksManager for 30 days for free.
