**One of the best and easy to use cms applications**, Nov 18th, 2006

Reviewed By: GuidingLight

I've tried numerous cms applications and none really come close to Site Composer for ease of use and feature rich for the price. I have also had some custom work done via support which is second to none, as the work was complete within a couple of days. You can see a personal site that I have using Site Composer here [www.touchheartpoems.co.uk](http://www.touchheartpoems.co.uk) and I am starting another bigger project soon using the very same application. For the price, features and support you wont be disappointed with this app.
