# ASP.NET Free Content Management Basic CMS

Hits: 31,205

**Description:** Content management system built with asp.net and ms access. Simply copy the files into a folder and it's ready to run. The file manager can upload and delete images or other documents. Edit your pages on the fly with your web browser with document preview. Unlike most content management systems, you control the complete look and feel of your pages. Basic CMS is ready to be built into existing products to add content management functionality, or works great as a main website.

## Resource Specifications

this is very useful to .net developer  
great work

**Didn't work for this complete rookie**, Apr 2nd, 2007

I followed the instructions, which were easy to understand, but the product didn't work. I just got started at this and have no idea why it didn't work but I tried it because it seemed straight forward. What I did see of it, it didn't seem to do much.
