Random Picture Generator

Hits: 3,696

Description: This random image generator was made because I wanted a solution that had a URL for each image and I released it here for people who want the same thing. It simply indexes all the images in a photo directory and gives each image a unique ID and thats how the system works.

Resource Specifications

Version:	0.1
Platform(s):	Any PHP/MySQL enabled system
Price:	Freeware
Date Added:	Jun 22nd, 2004
Last Updated:	Jun 22nd, 2004
