BAD TECHNICAL SUPPORT, Sep 27th, 2008

Reviewed By: maurivi

Technical support bad, they did not want to tackle my questions and I tried so bad
There were no charge of technical support and did not want to respond on the
integration of the script to the design of my site

Having trouble with sending mails, also wanted to helpme

Paid leave when they could have downloaded nulle from anywhere just by having
the service technician and not really worth it.

Respons for answering my consultations and bad ways is Michael Sams
