Payment processor script like Paypal or Stormpay Hits: 2,875

Description: Payment Processor Script has many of the functions that established payment processors have, and is, obviously, designed to make its owner money. Payment Processor Software is fully automated when installed on your website leaving you with very little work to do. This dynamic software has been programmed to do most everything automatically, from helping customers instantly recover lost passwords to sending receipts to customers for their records after they have made a purchase. Key features include member area, advance admin panel, fund account using paypal, stormpay, credit card, echecks or money orders. You can set your own transaction fee. FAQ and help system inbuilt. Ticket system to help your members reach the site admins for additional help.
