Axis Enterprise Time Tracking Calendar (Free) Hits: 8,644

Description: This PHP software was designed to provide everyone with a calendar and associated tasks with each day. This software also will allow for Calendar administrators to manage users based on groups. For example the tech group could include a number of users, which are all assigned a mandatory 40-hour a week schedule. The software allows administrators to generate reports based on individuals and group to see how much time they are spending on particular task. Software is 100% free! See web site for free download and more details on features.
