## Password Protect

Hits: 1,028

**Description:** Password Protect allows you to protect folders on your PC, network, or USB Key with a password. This is your ultimate solution to block out access to folders to unwanted users. Key Features: Folders remain protected in DOS, Windows Safe mode, and in other operating systems; passwords are not stored on your drive or in the Windows registry keys; you can protect unlimited number of folders and subfolders in the full version; support for USB external and removable drives.
