# Popup Color Picker

Hits: 3,352

**Description:** Picking colors has never been easier: The Color Picker form control provides your users with a clickable, dropdown color swatch for color selection. Your users only need a mouse and a sense of color coordination to use this control. As a result, non-proficient users are not exposed to the underlying Color coordinate system, whereas proficient users may utilize an easy-to-use input interface for specifying their Colors in a more accurate fashion.

## Resource Specifications
