TaskPortal - Task Management and Project Tracking Software

Hits: 4,440

Description: TaskPortal is an easy to use Collaboration Extranet, Task Management & Project Management System. It makes working together with your teams, clients and suppliers easy and accountable as well as allowing you to manage all your projects, work tasks, requests and teams from a central location available anywhere, anytime. TaskPortal provides project managers the flexibility to customize the application and set up the projects to best suite their needs and provides intuitive reports, Gantt charts and Calendars to easily schedule the work tasks. Key Features include: project management, task tracking, document management, file sharing, project reporting, role based administration, auto email alerts & user centric design. The system can be setup on our servers as an online hosted account, or can be run on your own servers.
