## PHP graphical hit counter

Hits: 8,053

**Description:** PHPGcount is a PHP graphical hit counter. It uses flat-text database so no SQL databases are necessary. It comes with many styles to choose from and you can add your own styles easily! It can count hits for multiple pages of your website or even websites on other servers. It can be configured to count unique visits only. The count is displayed on the page using a simple Javascript code. You can use one copy of the script to count hits on multiple pages.

### **How easy is this to setup? VERY**, Apr 9th, 2005

This is a great PHP counter script.... I've had problems in the past using perl ones so decided to try a PHP one and this was the first one and I won't be trying others. This one is excellent and so easy to setup. I'm using Windows and Apache and it was a doddle ;-)

### **Great Script**, Sep 18th, 2006

This is a easy to use, easy to install script that does exactly what it claims. If your looking for a basic hit counter that takes less than 5 minutes to get up and running, this is it! Very simple to customize to fit the look and colors of your site too.
