PHP click counter

Hits: 25,302

Description: Ccount is a PHP click counter. With its help you can count clicks on any link on your website. A great tool if you want to know how many times a link has been clicked, a file downloaded and similar. You can also hide your affiliate links with PHP click counter. As long as it's a link - Ccount can count clicks on it! It can be configured to count unique clicks only.

Ccount uses flat-text database so no SQL databases are necessary. I have also developed an admin panel, where you can view link statistics: how many times a link has been clicked (both numerical and graphical display of stats), link with most clicks and average clicks per link. You can also easily add, reset or remove links in the admin panel.

Nice tracking tool, Oct 8th, 2004

Reviewed By: plmerlin

This is one of the most useful tool I have. We use use it with our newsletter and it give exactly the information we need: how many people click on the links! Very simple to install and to use. No bug. Perfec tool for tracking purposes.

Simple & Neat Tracking Program, Nov 19th, 2004

Reviewed By: NBA2005

This PHP click counter is very easy to use, excellent for newbies. Plus, it has a very simple and neat interface.

A Must have script for tracking downloads, Feb 20th, 2005

Reviewed By: 3GPXtreme

I have been looking for a script like this for months, every other script like this is a pain in the neck to get working properly, the only down side is that it does not give a top ten clicks/downloads but im sure that will be in the next release, well done people you made a top class script here. A+++++++

Great simple script, Jul 8th, 2005

Reviewed By: rtt1969

This script is great, installed easy, no problem at all. Only thing is that I only got it to work with links within my site, I couldn't get it to work with links going to other sites, but I probably just didn't do something right. I give it a #5 rating.

Fantastic, Jul 30th, 2005

Reviewed By: winmodi

wow, I'm quite a n00b when it comes to installing/using scripts but this one is just to easy, everything works fine and is explained very good. I defenitly am giving this one a 5 !!

Excellent script, Aug 9th, 2005

Reviewed By: tshwang

I found this script very useful. Keeps a perfect count of all the links and I have yet to encounter a bug. The only recommendation I would have for it is to allow alphabetical id's. For example, instead of having just an id=1, allow for an id=picture.jpg or something of that nature. Another recommendation is sorting the list by date, hit count, filename, etc would also be useful. I look forward to future releases.

Great Job, Aug 12th, 2005

Reviewed By: starapple

This is an elegant little script. There's beauty in its simplicity: clear set-up instructions, simple to set up, works exactly as stated.

An excellent counter made easy, Aug 16th, 2005

Reviewed By: Willmaker

Just an awesome counter. Works perfectly, and can be installed with very clear and simple instructions.

Script in action, Nov 24th, 2005

Reviewed By: ecuador

Well, not bad this script, does it hide the real link from prying eyes. Yet I am using it for a public news magazine converted to flash pages, and the onliest thing i lack is a function to track down the ip who clicked on a particular link. Maybe this would be a function for future releases? Everything else is working fine, and I can with calm consience say, it's worth downloading it.

Basic but excellent, Jan 12th, 2006

Reviewed By: vinnyh

Great script. Very easy to install and use and provides basic but excellent link tracking facilities.

What would be nice is the facility to exclude clicks made from your own PC, maybe by using a cookie, as clicks made when testing your site contaminate the log files.

Brilliant!, Jan 26th, 2006

Reviewed By: Matthewdownloads

A brilliant bit of software. Easy to setup and install. I did it in less than a minute. It really does work. You won't find an easier script like this anywhere else. And MSQUL is not needed! Pure PHP!

Simply put...this script fits the bill!, Mar 4th, 2006

Reviewed By: samrcat

Clear instructions, easy to implement. Worked immediately exactly as described on text and image links, on and off the website. Would recommend this script for someone that needs basic click counting stored in text files. I offered another script (with mysql database) to a client, but installed this one instead. He has very little code experience and he really likes the clean simple interface of the Admin panel. This script made his day! THANKS!

Very useful, Mar 7th, 2006

Reviewed By: dsilwal

I am using this script in my site and many members from my site has told me that this is one of the useful script on the net. If you have a site which contains php then you should use this script because it saves time and is very easy to use.

Thank you very much for making this script.

Great tool, May 7th, 2006

Reviewed By: zztobanana

This is a super little piece of code - does what it says on the tin.

Enough said, really - spot on and thoroughly recommended.

Easiest ever 'click counter', Jul 9th, 2006

Reviewed By: Encrypt247dotCom

Ccount may not be a feature packed tracking solution, but if all you want to do is 'count clicks'... well this is as simple as is gets.

Pro's :

- It's FREE
- No database to create or configure
- Very simple installation, even a beginner can do it.
- Easily add new links
- Ability to back up and restore log files
- An effective way to mask affiliate links

Con's:

- Logs nothing but clicks
 - Have to reset all counters individually
- (Maybe a 'Reset All' button can be added to a future release *Hint

Fast and Clean, Jul 16th, 2006

Reviewed By: netpro

This script is fast and clean and I recommend it to the Pro or the Novice user. Easy to install and it does everything that it says it will. This script is right up there with the best and I am really pleased that for now it's free.

Exactly what I needed, Nov 22nd, 2006

Reviewed By: mattenderby

I was looking for a way to track the clicks on my site. I have a site with about 1100 photos and I wanted a way to see how many times each photo was clicked. This was exactly what I needed. Once I got it set up per the readme it worked like a champ. It took a bit of work to get it working right but it works great!!! Thank you!!!

Neat little click counter, Nov 6th, 2006

Reviewed By: Huttelihut

Cclick is very easy to use and just what I need to figure out what clicks I get in an easy way. Recommended.

Great Script, Dec 3rd, 2006

Reviewed By: JFleeting

I have used several counters in the past and this is the best. Its easy to install, setup, and use. No bugs or problems. I love how simple it is. It does its job, which is counting clicks.

Great 'ease-of-use'., Jan 17th, 2007

Reviewed By: zac_raines

After trying 6 different click counters this was the best I found. I wanted to count how many times a software was downloaded on my website and this did the job great. So easy to set up and requires only PHP setup on your server.

Easy to use, setup in minutes, Jan 31st, 2007

Reviewed By: SpiffyJ

This works exactly like it says. Easy setup and you don't have to struggle to get it to work.

Ccount...thumbs up!!, Feb 2nd, 2007

Reviewed By: Inzman

Ccount is a PHP click counter. And a good one. It's VERY easy to use and it does the job perfectly! And the thing with me is that on my favorite server there is no SQL option so its important that Ccount uses flat-text. And more good words at the admin panel, it gives a good view at the statistics and of course it's very easy to use. Ccount is actually the reason for me signing up at Hotscripts so that I could write that review. So thumbs up for Ccount people! 5 out of 5!

Got to have this one!, Mar 5th, 2007

Reviewed By: prismdaisy

I have searched the net looking for something like this. I like the fact that it does not use mysql, I have a limited amount so that helps out a lot. Thanks for such a wonderful script!

Easy setup, Mar 9th, 2007

Reviewed By: onasre

this is very useful script for counting hits for any links u add , its good if u have long URL , this script can convert it to short url that can be indexed by Google.

Excellent script, Mar 15th, 2007

Reviewed By: santhosh44

Excellent script. Very simple to install and use. Download it and start counting the clicks in less than 5 minutes. Feature request - Wish if there was an option to track the IP of the visitors who all have clicked on the link .

Excellent click counter script, Apr 29th, 2007

Reviewed By: velociphiles

I have spent the last few days looking for a script like this to monitor opening rates and clicks from my html newsletters. I use notonebit.com simple mailing list to send them and it does not include tracking. I considered upgrading to phplist but it is far too complicated for what I need. I even tried using Google Analytics, but some email clients block Javascript. I downloaded this script and had it working in 20 minutes. Brilliant!

Who's clicking on what?, Jun 9th, 2007

Reviewed By: puniksem

Simple to install, informative password protected admin panel. Custom links replace existing links, so when clicked on, the counter script keeps track!

You can monitor the details via the admin panel or place link counters on the corresponding pages, or as I have done created a statistics page with a collated view of all hits.

Using this script means users are more inclined to click links if they see others have already, sort of inspires a confidence.

Keep up the good work!

PHP Click Counter is THE Business, Jun 22nd, 2007

Reviewed By: roynorry

How simple this script is to install. Once installed, how easy it is to use and remarkably effective too. A delight to employ.

Suggestions for future releases would include the ability to have link categories so that I could monitor specific 'grouped' links, and some sort of edit provision for when I make a mistake adding a URL to the system, although it's easy enough to edit the .txt file that keeps the said data. Easy to use and extremely useful. Thanks to the author of this script.

Even a newbie can use it (Brilliant), Sep 14th, 2007

Reviewed By: szf61

I searched the web for this kind of script for ages !!

You guys did just an amazing job.

No errors...

No fiddling around with complicated setup procedures....

Clean interface ...

Just keep up the good work

Poetry in Motion, Sep 20th, 2007

Reviewed By: skydevil

I was looking for a link counter to keep track of the times the links were used on my links page, and this one was simply PERFECT. Extremely easy to install and even easier to use. Not only do you get good stats on the Admin page, but you also have the ability to display the 'hits' to your visitors. Ten out of ten from me.

Review for Version 1.2 (latest version), Oct 30th, 2007

Reviewed By: puniksem

I have used Ccount v1.1 for some while now and looked forward to the updated version, With version 1.2 one can now edit links and not just reset the counters to zero, but you can now start the counter from any point. version 1.2 is well worth updating!

Excellent script; needs support date breakdown, Jan 26th, 2008

Reviewed By: acalsop

This is one of the better scripts I've installed. It is reliable and was easy to install and does as advertised. It would be over the top if there was a way to break down the clicks by date range. Because it just keeps track of the total (unless you diligently reset the counter on a regular basis) there is no way to track if you clicks are growing.

Thanks for the script - it is definitely a good one.

As great as it can be!, Mar 12th, 2008

Reviewed By: Imad Jomaa

I create php scripts and redistribute them as-well. However, I did get lazy when it came to download tracking. This did what I wanted and is flawless.

Great Click Counter, Mar 22nd, 2008

Reviewed By: bizbla

This has been the perfect click counter for me. If you're looking for one that does not require a database, this is it! It's so easy to install & use and it never misses a click :)
