Disappointed!, Jul 13th, 2006

Reviewed By: ziggy2004

After reviewing the code and the tutorials given, I found that the "Actual" code in any of the examples don't even use the code in the tutorial.

Perhaps this could be something to fix for the people who wrote the tutorial. At least use the same code so that others can follow along.

The tutorial should also explain "How" to use the code to create the menus, not what the code is doing!!! That's what JavaScript tutorials are for.
