Basic Form

Hits: 2,281

Description: A very basic and easy to use website form processor that comes with a comprehensive form template. Packed with powerful features but very simple and quick to install. Form results are sent to your e-mail address and the customer is directed to a fully customizable on-the-fly results page. Optional text or HTML autoresponder provides excellent customer service and allows your customers to easily come back to your website. Optional field verification allows you to make individual form fields required and the error message can be modified to suit your needs.
