Case Converter

Hits: 789

Description: Allow you to convert any words and even file names within content of files to lower or UPPER case. If you want to convert all file names to lower or UPPER case you no need to enter each name. You need enter only extension. It very useful if you need to to move all of our hosted domains from a Windows NT platform to Linux. This is actual because Linux is case-sensitive, both for file names and file content.

Resource Specifications

Version:	1.1
Platform(s):	Win95,Win98,WinME,WinXP,WinNT 4.x,Windows2000
Price:	\$0
Date Added:	Jul 31st, 2004
Last Updated:	Aug 2nd, 2004
