JSPMaker

Hits: 3,231

Description: JSPMaker is a powerful yet easy-to-use code generator that creates a full set of JSP (JavaServer Pages) quickly from MySQL or Oracle. Using the generated JSP, users can view, edit, search, add and delete records in the database easily on the Web. Generated codes are clean, straightforward and easy-to-customize. With JSPMaker, JSP developers can build Web applications much faster than ever before. JSPMaker is equipped with a number of cool features, including file upload to database or folder, master/detail, advanced security, field aggregation, CSS stylesheet, remote connection using JSP. All MySQL data types (including ENUM, SET, BLOB columns) and commonly used data types of Oracle (including LOB columns) are supported.

Resource Specifications

Version:	1.1
