IIS Bandwidth Monitor

Hits: 1,623

Description: Monitor bandwidth usage in near real-time for individual sites on IIS6 without reliance on Log files. Supports websites on load balanced servers, automatic disabling of websites upon overage, and persistence across reboots. Includes sample ASP scripts for reporting per website, per day. Supports logging of data to MSDE, SQL Server 2000, MySQL and Oracle 9+. Currently in Beta. Download an unlimited duration, 3 site trial.

Resource Specifications
