## PHP News Feed

Hits: 3,547

**Description:** PHP Newsfeed started out as a way for us(WilsonNCAreaBusinesses) to give our users the news that matters most. Sure, you could use Moreover and get great news on your site, however they lack in the ability to offer local news. So, after some searching, it was clear that we needed our own XML feed generated off of a MySQL database, so that we could post local stories that we came across, or headlines provided by Moreover.
