## Avanti Web Stats by Liquid Frog

Hits: 3,467

**Description:** Avanti Web Stats Lite is the popular professional desktop/web-server application that allows you to monitor incredibly detailed stats from ALL your sites in just one place - right from your desktop! Providing a wealth of highly detailed information on your site visitors, this innovative approach makes Avanti Web Stats very popular with professional webmasters. Easy to set up and very simple to use and understand, Avanti Web Stats tells you everything you need to know about traffic to your sites and also tells you whether your sites are reachable by your visitors. Avanti Web Stats will constantly monitor all your sites and notify you immediately should a site become unavailable - it will even provide you with a hit counter for your pages.

See how many hits you've had, where they've come from, at what times and see which operating systems your visitors are using, their screen resolutions, IP addresses, country of origin and much, much more. You can also search your stats by defining date ranges and view the data using text or charts.

You can even track visitors right through your site to the exit page and, with highly detailed individual visitor tracking, you can see where you are losing your precious traffic and make changes to keep them on your site. Avanti is the Daddy of all web stats packages! Check our site for full details. UPDATE - Avanti Web Stats V1.1 now available with increased functionality.

### Resource Specifications
