# iTAG® RFID Access Control Engine for TI 6410 Series Hits: 1,014

**Description:** A number of companies in the security and access control industry are incorporating access control into a range of perimeter and building security systems, as well as vehicle and parking access applications. Transponders can be mounted on automobile windshields, contained in employee badges, or carried on key rings. Readers are mounted inside walls at doorways and outdoors alongside entranceways to parking garages and lots.

The iTAG® RFID line of 13.56 MHz badges and readers, brings the access control market the superior security, faster transfer speed, and 2000-bit memory of the ISO 15693 vicinity card standard, delivered by the global leader in RFID solutions.

As a pioneer in 13.56 MHz technology in the Philippines who has built innovative solutions from retail and logistics tracking to wireless payments systems, AC Corporation is harnessing this powerful technology for the security and access control industry.

## Resource Specifications

<b>Version:</b>	v2.1
<b>Platform(s):</b>	Win .NET
<b>Price:</b>	\$995.00
<b>Date Added:</b>	Aug 21st, 2004
<b>Last Updated:</b>	Aug 23rd, 2004
