PS ClickTraders

Hits: 636

Description: Flat-file database software will crash your server or the software after about 5,000 hits per day. These systems are commonly banned on most IPS for this reason. clicktraders employs streamlined code, MYSQL binary database support, and the latest code tricks from the gurus to provide a superfast link exchange system that will handle even the largest link exchange sites. Banners are served from the client server so you don't have to pay bandwidth for all of those impressions. Provides editable subtext link that appears every time a banner is generated to drive your program. Ergonomic statistical interface tracks raw/unique impressions and clicks through new technologies developed by Superscripts.com that do not rely on bogging down your system with huge databases of ip addresses. Super Link Exchange members can BUY credits to get more impressions by the push of a button where they are transported to your handy order form. Uses either syntax or realtime validation through Authorize.Net. clicktraders can be customized for any billing gateway by our cgi gurus. There is truly nothing like this on the internet. Credit buying interface supports Mastercard, Visa, American Express, JCB, Diners Club, Novus, and Online checks. Admin interface allows you to check the overall system performance and statistics, browse through and count your users, bulk email your members and edit/delete their information.

Resource Specifications
