Cute Chat -- A full-featured ASP.NET chat program

Hits: 6,289

Description: (New Version 4.1!) This easy-to-use ASP.NET chat program is designed for Web sites and intranets. It provides an inexpensive way for you to start your own chat community, conduct online meetings or conferences, provide your customers with "live support" and real-time consulting, hold moderated or celebrity chats, and host time-based chat events.

Through CuteChat's flexible features, you can customize practically every aspect of the software to integrate with your Web site and your business needs. This ASP.NET chat system has been the choice of the leading web sites, from around the world, from small to largest Portals.
