Extract Emails

Hits: 978

Description: Extract Emails is intended for extracting email addresses from files and folders located on a PC or on the Internet, it lets you find all email addresses you have on your PC, extract only those of them you need, and place them to a plain-text file, which can be used by any email program or mass mailer. Extract Emails allows you to filter emails automatically while searching. Just define a powerful filter, which lets you specify the list of allowe
