Salary Profit/Loss Calculator

Hits: 2,075

Description: This is a small utility to calculate the net income by checking a person's salary and monthly expenses, on the basis of this information it calculates the loss/profit. It has a nice graphical User Interface with different formats to show the information i.e.

Pie Chart: Shows the information in Pie chart with different colors for salary, expenses and net income. Tabular: Show all the information in tabular form. Bar Graph: Shows the information in Bar Graph with different colors for salary, expenses and net income.

This software is provided by MYCPLSU with the source code, you are free to use this code as you need and change the code.
