Cute Editor for .NET - ASP.NET HTML Editor

Hits: 29,357

Description: (New Version 6.0!) Cute Editor for ASP.NET is by far the fastest, easiest, most powerful WYSIWYG (What You See Is What You Get) browser-based HTML Editor for ASP.NET. It enables ASP.NET Web developers to replace your standard Textarea to a rich textbox. This rich editing tool empowers end users with an intuitive, easy-to-use interface for creating and publishing web content without relying on any client-side components or controls. Cute Editor has more than 5,000 customers, and has been sold in over 60 countries. 23 languages are supported, and more are being added.

The Cute Editor team is pleased to announce that the long-awaited version 6.0 has

finally been released. All users of the previous version of Cute Editor are entitled to a FREE UPGRADE.
