tGedit Pro

Hits: 1,076

Description: tGedit is a WYSIWYG HTML Editor that can be easily inserted into forms and applications using a simple Cold Fusion custom tag or PHP function call.

Unlimited redistribution licence when included as part of a larger project. Ideal for developers.

tGedit emphasizes speed and efficiency of code whilst supporting a comprehensive range of features. Our download footprint for the full editor is only 300kb. During use memory and cpu overheads are minimal.
