phPhotoAlbum

Hits: 2,030

Description: phPhotoAlbum has got to be the easiest drag and drop photo album around. It sports an easy customizable look, and very powerfull features. With this one little file, you can make a whole photo album, very easily. Have it creat thumbs for you on the fly. (Requires GD Library) Features include, unlimited directory + sub-directory support, ignored files, only show certain file types, auto image resizeing if desired, and simplicity. Plus it requires no mysql database! All you need is this one little file, and your files! All that you need to do to create your album, is make folders and put images in them. The script does the rest. How much simpler can it get? Well, it now comes with a simple admin panel! You can make folders and upload images without your ftp client! Now, it can't get any easier. You can also do it the old fashin way with the ftp client if you like and turn the admin panel off!
