Advanced Search Engine

Hits: 5,227

Description: Finally it is available. A Google-like search engine for any web application, or standalone that can do it all. Indexing files, web and database content.

Many search engines are standalone search engines and run only on one platform. AST@NET's search engine is 100% web-based and can be deployed into any web application. Its powerful algorithm lets you search through thousands of documents in no-time. You can index files in directories, database content and web pages on the internet. All in one search engine. Index many document types like doc, pdf*, xls, ppt, txt, html, php and many more. Installation and integration into existing web environments is easy and rapid. Get Google-like search capability for your web application or use it standalone.

Resource Specifications

Version:	1.01
