Visitors Web Log Analyzer

Hits: 2,610

Description: Visitors is a very fast Web log analyzer. It can process up to 150,000 lines/second of logs on a modern PC, outputs statistics in plaintext or HTML, and can be used interactively in a pipe with less to just see the stats quickly, or run via cron for the HTML output. It does not require any kind of configuration, nor to know the format of the Web log file to process.

Resource Specifications

| | |
