A refreshing change!, Sep 25th, 2004

Reviewed By: Llyssa

I have hosted 2 forums through Jconserv for the past month, and I have to say that their approach to keeping their customers happy is exemplary. The forums are activated nearly instantly, through e-mail, and from then on - it's wherever your imagination can take you! I must say, the Support and Administration staff have been competent, patient and assertive - a refreshing change from some hosts I have had the dubious pleasure of doing business with. For Free, remotely hosted forums, the amount of mods and Administrative control and Quality Customer Service that you get, I don't think you could do better...than Jconserv.

I can only hope that they continue to stick around for a long time.

Best Free Phpbb Hosting Around!, Oct 29th, 2004

Hey,

Jconserv in my opinion is the best free phpbb forum hoster around! With continuous modifications and templates installed, as well as a great support team to assist you in any troubles, I really didnt think it was possible to come across such a great hoster.

I advise anyone looking for a free phpbb forum to check this site out. I can almost guarentee you will be overly satisfied with what they offer. Its almost an essential need for someone looking to make a small community.

Some modifications you can enable/disable with the click of a button are the quick reply, attachment modification, smartor ez portal, the cash hack, custom logo and emoticons, all languauges as well as around 50 templates, its an offer not to be missed!

Overall, the support is simply devine as well as the fact everything is easy around. Yes, no sitting around bashing your computer screen in. A swift, simple and easy to use forum you can have in seconds to come.

So with that in mind all I can say is... What are you waiting for? Theres a free phpbb forum with your name on it!
