AgileBill Billing System

Hits: 4,635

Description: Agileco's billing application for the SME is a stand-alone, web-based billing application that completely automates account registration, ordering, subscription management, automated invoicing, recurring billing, account management, commerce reporting, and newsletters. AgileBill supports unlimited themes, languages, and currencies. Supports over 40 payment processors for full order and invoice automation. Agileco's Content Protection solution enables content and service providers with various tools to lock down their online content and/or services, effectively limiting access and routing user registration and authentication through the AgileBill billing application. A database mapping module enables integration with forum, CMS, and other popular applications.

Also features optional affiliate, ticket management, web hosting provisioning, and domain name registration modules. Free downloadable trial version available.

Resource Specifications

No Product, No Answer, Oct 5th, 2006

Reviewed By: whatthe

Apparently this company no longer offers this product or answers their email. This product sounded great as does the new one but good luck getting a response much less a price quote. Tried on several occasions through their web sites contact page and no response....the search goes on...

AgileBill is dead!, Jun 9th, 2007

Reviewed By: joell

This software and the company behind it are now defunct. Existing customers no longer have access to technical or sales support from AgileCo. The maker of the software has disappeared. No body answers the phone or email. **WARNING: BUYER BEWARE!**
