# InfoMail Editor

Hits: 767

**Description:** Database that merges product data and images with address book data in order to generate e-mailable web pages. It makes it simple to instantly build and send personalized, branded, and hyperlinked electronic brochures, catalogs, and newsletters. InfoMail pages are in standard HTML format so text and images can be configured as clickable hyperlinks that connect to web sites, run database queries, enlarge images, or start e-commerce sessions.

## Resource Specifications

<b>Version:</b>	2.0.0.4
